Bollettino di Matematica pura e applicata

III

The *Dipartimento di Metodi e Modelli Matematici* of the Università di Palermo is operative from 01.01.2005. It was created thanks to the will of the all the professors of the mathematical area of the Facoltà di Ingegneria. Both the scientific and didactic activity of the *Dipartimento di Metodi e Modelli Matematici* can be found in the web-site www.dmmm.unipa.it. From its constitution it has been involved in many collaborations with Italian and foreign researchers. The aim of this Bollettino, with annual periodicity, is that of covering the areas of mathematics existing at the *Dipartimento di Metodi e Modelli Matematici*. The papers emphasize the advances of knowledge in mathematics problems and new applications. The *Bollettino di Matematica pura e applicata* comprehend the following sectors: Analysis, Geometry, Mathematical Physics, Probability... and it is also open to the contribution of the other Italian or stranger researchers.

Editors Tommaso Brugarino, Maria Stella Mongiovì.

Editorial Committee

Pietro Aiena (Palermo)
S. Twareque Ali (Montreal)
Maria Letizia Bertotti (Bolzano)
Luis Funar (Grenoble)
Renata Grimaldi (Palermo)
David Jou (Barcelona)
Valentin Poenaru (Paris-Sud)
Karl Strambach (Erlangen)

I edizione: dicembre 2010

Contents

P. Aiena, M. González <i>On the equivalence of the Dunford property (C) for linear operators RS and SR</i>	1
F. Tschinke <i>C^*-seminorms generated by families of biweights on partial $*$-algebras</i> .	11
P. Aiena, E. Aponte <i>Operators of polaroid type and perturbation theory</i>	21
M. Pavone <i>On the solutions of the differential overland flow equation</i>	33
C. La Russa <i>Fréchet-valued Pointwise Lipschitz maps</i>	43
D. Bongiorno <i>A Riemann sums method in the Theory of Vector Integration</i>	51
L. Funar, R. Grimaldi <i>Sur la croissance des variétés à géométrie bornée</i>	63
G. Falcone <i>A spinorial decomposition of $gl_4(\mathbb{R})$</i>	71
S. Triolo <i>A slight extension of the noncommutative integral</i>	79
A.M. Alghamdi, D.E. Otera, F.G. Russo <i>On some recent investigations of probability in group theory</i>	87
F. Bagarello, F.F.G. Calabrese <i>A no – go result for pseudo–bosons</i>	97
V. Hudon, S. Twareque Ali <i>Coadjoint Orbits of the Poincaré Group in $2 + 1$ Dimensions and their Coherent States</i>	105
F. Rigoli <i>Precessioni per un satellite sottoposto alla forza newtoniana</i>	129
D. Jou, M.S. Mongiovì, M. Sciacca <i>Study of the anisotropy in turbulent superfluids</i>	141
R. Caserta <i>On Hadamard matrices</i>	165
M. Valsecchi <i>Cyclic-by-abelian Moufang loops</i>	175
R. Caserta <i>On the geodesic loop of the 2–sphere</i>	183
E. Tornatore, S.M. Buccellato <i>SIVS epidemic model with stochastic perturbation</i> ..	189
L. Ardizzone, G. Gaeta <i>Nonlinear evolution equations for turbulent superfluids</i>	197
A. Caggegi <i>A note about additive $2 - (v, 5, \lambda)$ designs</i>	205
