History

On 16 th June 1998 the first independent university was established in Legnica. The university was starting without its own material basis or academic didactic staff. In spite of this within a few years the school has become one of the largest of the kind in Poland. The biggest because over nine thousand daily, extramural and post – graduate students are educated here and the area of the didactic hall exceeds 21 thousand square meters.

Material basis

The building A – there are administrative rooms, lecture halls, language rooms, class rooms, computer study rooms and a weight training room, fitness club, café bar.

The building C - there are, among others: lecture rooms, computer laboratories, language study rooms, classrooms and the university's library.

The building D - there are specialized study rooms and laboratories: an Eko study room, biochemical and toxicological laboratory, anatomy study room, electronics and metrology study room, micro-processing engineering study room, e-learning study room, a Socio-Therapeutic Centre which is intended for the socio-therapeutic work with children and youth as well as being a support centre for parents of children with dysfunctional behaviours.

The building E – there are four lecture rooms there for over 1 000 people in total.
